Vrontech Inc.

Winnipeg, MB, Canada

Introduction to Vrontech OHS Training Platform

Vrontech Inc. is a tech startup in Canada. We are on a mission to improve OHS training across the country by utilizing Virtual Reality technology.

Virtual Reality creates a safe and controlled environment for OHS training realistically simulates workplace scenarios. VR-based immersive learning can also be delivered remotely, enabling the employer to consistently deliver training that is accessible and scalable, removing the requirement for employees to travel long distances to on-site training centres.

We have developed an all-in-one platform where we offer fully immersive VR OHS programs to businesses in a variety of industries. The also includes user tracking and data analytics to allow employers to follow an individual's learning progress.

It would be appreciated if you spend a few minutes completing our product survey. It helps us to know market pains and improve our portal to fulfill training need of employees.

By answering the following questions, you help us to better understand;

- What the current OHS training process looks like for your company;
- Which tools you use for OHS training;
- What challenges you currently face with your current tools and training plan;
- Your willingness to employ new tools;
- And your willingness to pay for new tools.
